

The place to achieve your high-stakes goals

It's where the integrity of your organisation and the strength of your credential are affirmed. It's a setting where candidates prove their knowledge and demonstrate a desire for excellence. It is the place for unparalleled security, control and convenience. This is a Pearson Professional Centre, and it is simply the best testing environment in the world.

We start with industry-leading exam security.

Your tests are the foundation on which your credential is built, so protecting them from theft and fraud is critical. As part of our patented security design, Pearson Professional Centres are equipped with state-of-the-art surveillance and glass-enclosed proctor stations. Video, audio and certified professional proctors play a key role in preventing cheating. A layered system of biometric verification that includes palm vein recognition technology provides assurance of a candidate's identity and deters proxy testing. Equally important are the safeguards we have in place to protect the confidentiality of testing data, including locked server rooms and encrypted data storage and transmission.

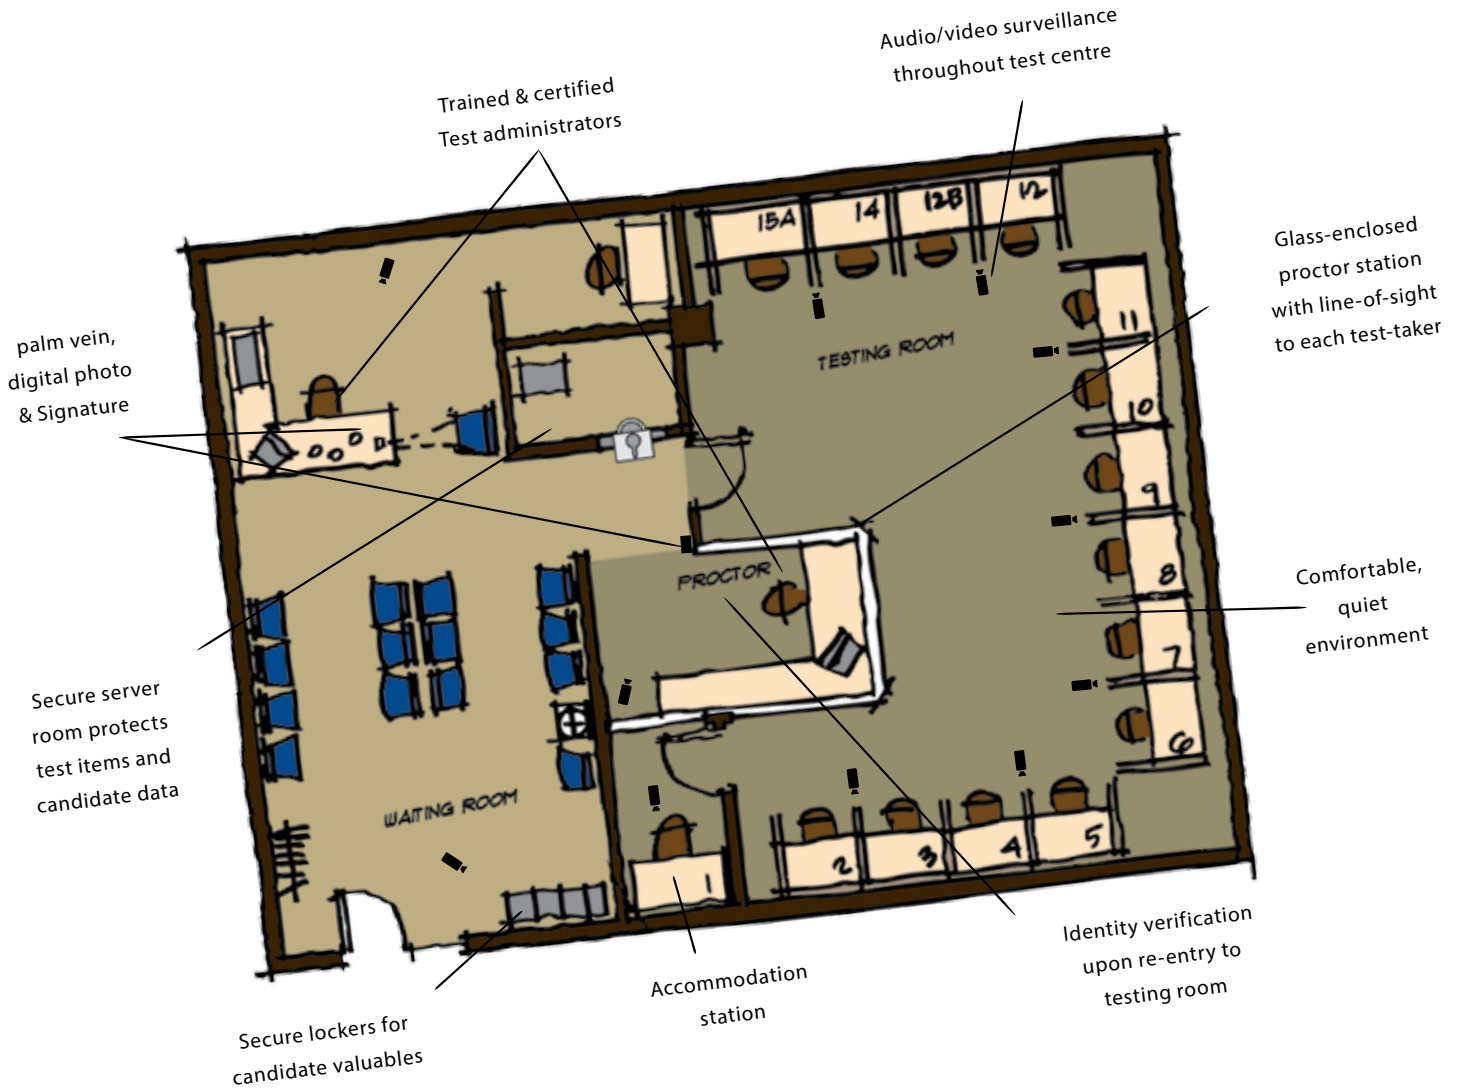

And finish with an unparalleled testing experience.

We take our interaction with your testing candidates very seriously by making sure our online and call centre scheduling systems are effortless, check-in procedures are automatically enforced and testing centres are geographically convenient. Candidates are greeted by Pearson VUE's professional and welcoming staff and test in a quiet, distraction-free environment that encourages peak performance.

Company-owned and operated, Pearson Professional Centres are the place where your two most important assets, your high-stakes exams and exam candidates, are equally well-served.

Pearson Professional Centres

Pearson Professional Centres are located in major markets across all 50 states, the District of Columbia, US territories and more than 30 international locations. 90% of Americans are within 60 miles of a Pearson Professional Centre. With state-of-the-art security, comfort and convenience, Pearson Professional Centres are designed to protect your exam and candidate data while providing the finest testing experience possible.
